FRIDAY

SATURDAY

30

The Wright brothers' first flight in 1903 lasted just 12 seconds.

NOVEMBER 2025

ROBINAGE

1

Sharks are older than trees! They appeared over 400 million years ago, while the earliest trees evolved about 350 million years ago.

2

Did you know, hot water can freeze faster than cold water—it's called the Mpemba effect!

3

Believe it or not, more than 80% of the ocean is still unexplored by humans.

4

The world's smallest frog can sit on the tip of a pencil.

5

Ripe and overripe bananas glow blue under ultraviolet light.

6

On Mars, you could jump three times higher than on Earth because of weaker gravity.

7

One large tree can provide a day's supply of oxygen for four people.

8

Your stomach acid is strong enough to melt metal—luckily, your stomach protects itself by constantly making new lining.

9

What has keys but can't open locks? A piano!

10

A cockroach can live for a week without its head—surviving due to its decentralised nervous system and unique breathing method.

11

Sloths can take up to a month to digest just one leaf.

12

A group of hedgehogs is called a prickle.

13

Your stomach growls because of the muscles squeezing food and air.

14

It's **Children's Day**! India celebrates this day on Jawaharlal Nehru's birthday.

15

Every zebra's stripes are unique, just like human fingerprints.

16

Saturn's rings are only about 100 million years old.

17

Every year, Hawaii moves 7.5cms closer to Japan because of tectonic drift.

18

Koala fingerprints are nearly identical to those of humans.

19

The Cave of the Crystals in Mexico contains giant crystals, some of which are 37ft long, far taller than a house.

20

Did you know, your nails grow faster in the summer?

21

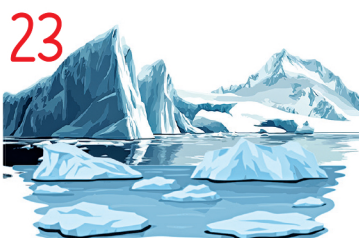

Ants can lift objects 50 times heavier than their body weight.

22

Lake Vostok is a lake in Antarctica that's been sealed under ice for millions of years and it has its own hidden ecosystem.

23

Ice is lighter than water—that's why icebergs float.

24

Your brain uses the same amount of power as a dim light bulb.

25

The first computer mouse was made of wood.

26

Your taste buds live only about 10 days before being replaced.

27

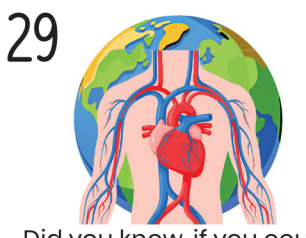

What has a neck but no head? A bottle!

28

Camels can close their nostrils during sandstorms.

29

Did you know, if you could stretch out all the blood vessels in your body, they'd circle Earth twice!
